DETAILED OFFICE ACTION

INTRODUCTION

1. This application/control number 10/702,500 has been examined. This is the first action on the merits of the claimed invention. The application has claims 1-8 pending.

Information Disclosure Statement

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper."

Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. Specification, Page 2, line 3 and line 9 discloses GM 75 39 613 and GM 93 19 701 respectively but references are not included in the IDS and documents are not provided.

3. The information disclosure statement filed on 4/29/04 and 6/29/04 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered. Relevance of DE 39 38 951 is discussed in the specification and it has been considered.

Claim Objections

4. Claims 3-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only

Art Unit: 3742

and/or can not depend from any other multiple dependent claim. See MPEP § 608.01(n).

Accordingly, the claims 3-8 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by CA 2316434 A1.

CA 2316434 A1 discloses a flexible heating foil (1) with a flexible support layer (2) on which at least one electrically conductive heating track (10) is arranged between two electrodes (16) via which the heating track can be supplied with current, the flexible support layer comprises a woven synthetic sheet (Page1, lines 5-7, page 2, lines 9-13, page 5, lines 5-8) on which at least one heating track is arranged and has one or more slitted areas (11) that serve as expansion joints (page 3, lines 9-16).

With respect to claim 2, CA 2316434 A1 discloses (page 8, line 20) instead of heating track (10) a plurality of conductive paths could also be provided.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vinod D. Patel whose telephone number is 703-308-5227. The examiner can normally be reached on 7.30 A.M. TO 4.00 P.M..
